505 N. Price St.
Marshall, TX 75670

INSTRUCTION:

All Wonderduck's run on either 1 or 2 D cell batteries. To locate battery holder, decoy head, and attachments you must first open the decoy. Under the decoy; find the green wire on the base of the black float. One side of the green wire is looped inside the decoy shell to act as a hinge. The other side will have the green wire poking through a hole in the shell. Gently press your thumb or finger inside the cut of the black float directly under the wire and the hole. Push the wire completely through the hole and open the decoy like a book. All attachments fasten on to the **FLAT** side of the motor shaft with a Phillips head screw. Slide the attachment as far as possible onto the motor shaft and tighten the screw on to the **FLAT** side of the motor shaft. Failing to attach Wing & Foot attachments near the base of the motor shaft will cause excess vibration and additional wear & tear on the motors. **DO NOT RUN ATTACHMENTS ON THE TIP OF THE MOTOR SHAFT!**

Attachments included with your decoy:

Weedless Adjustable & Interchangeable Paddling Feet

Wonderduck's **New Weedless Paddling Feet** for 2013 are 60% lighter, adjustable, quickly replaceable, and come in a variety of colors. Our new feet & attachments are designed to reduce motor vibration while increasing battery life and water motion. Wonderduck's New Paddling Feet are 1" wide & 3" inches long and create the illusion of small rotating wings. The feet are designed to add a flash of color similar to a ducks wing patch and are available in 10 different colors; giving you Water Motion, Decoy Motion and Sight Motion in COLOR all at the same time. The flash of color looks completely natural to a duck & may be the difference on getting them to your spread. Unlike rotating wings-our weedless/adjustable paddling feet-**WILL NOT FLARE DUCKS CLOSE IN!!!** If you believe they are creating too much Sight Motion, you can change to Black or Clear paddling feet. Black & Clear Feet provide Water & Decoy Motion without the flash of color. The decoy's swimming motion can be manipulated by adjusting Wonderduck's Paddling Feet inward or outward & by positioning the decoy's head to the left, right, or straight ahead.

Additional attachments sold separately:

Weedless Rotating Wings with Adjustable Purple Paddles

Wonderduck Paddle Wheel & Super Wonderduck Paddle Wheel can be used with a variety of wing, foot & paddle attachments. When used with Rotating Wings (with attached purple paddles) – Wonderduck gives you **Wing** Motion, **Water** motion, **Decoy** Motion & **Sight** Motion all at the same time. Wonderduck's 8 ½" Rotating are solid black. They can be spray painted White on one side; however Black & White Wings can flare ducks close in. Wonderduck's adjustable paddles are **Purple**. Duck's have a Purple Patch (some say its Blue) on its wings. God either put a Purple Patch on a duck's wing because he had nothing better to do that day, or **DUCKS LOVE PURPLE!!!** To purchase Wonderduck's weedless rotating wings with adjustable paddles please call 1-800-876-1697 or visit www.wonderduck.com.
